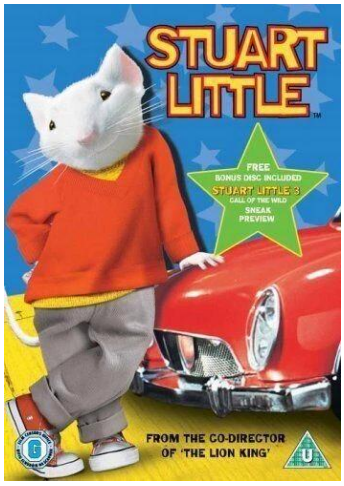
Friday 20th November 2026



Over the last few weeks, class 2 have been enjoying reading and writing about our new story - Stuart Little! We have read about his adventures and how he often finds himself in problems, like getting stuck in the washing machine – or even the fridge! The children have worked hard to practise their writing and punctuation dialogue and now they are ready to write their own Stuart adventure!

In maths, we have finished our additon and subtraction work and are now starting our multiplication unit. Y3 have been focusing on multiplying by 10 and 100 and using known facts to help them to work quickly. Y4 have been working on multiplying together 3 numbers and they have learnt about factor pairs for the first time!

In science, we have had fun learning about light, reflection and shadows. The children have loved being hands on when testing which materials are reflective, checking which materials are opaque, transparents or translucent, when searching the school for different light sources AND to investigate how we can change the size of a shadow.

In History, we are learning about the histroy of our local area and what makes Sharneyford a special place to live. To kickstart this learning, we enjoyed an exciting visit to Bacup Museum, where Wendy shared lots of interesting facts about local history. We were excited to see a book made by children in our school that was put into a time capsule a few years ago. We said it would be great to visit as adults and to look back at it and the role that we played in our local history!

We have had great fun in our first couple of Ukulele lessons with Nick. He has taught us all about the parts of the instrument, how to hold it correctly, the name of the strings and we have had fun copying his string patterns to a steady beat.

What a great start to the half term!
