Year 5 Arithmetic Homework

Given out: Friday 27th November 2026
To be tested: Friday 4th December 2026

This week's Arithmetic Homework is all about multi-step word problems. It is important you follow the six 'RUCSAC' steps to help you complete them.

Questions:

1. A school prints 28 worksheets for each of its 16 classes. After printing, the office finds **25 spare worksheets** from yesterday.
   How many worksheets are there altogether?

2. A factory makes 245 toy blocks each day. They run the machines for 14 days. After the run, they discover **300 blocks already stored** in a box.
   How many blocks are there in total?

3. A builder buys 4,500 bricks each week for 22 weeks. Before construction begins, **3,000 bricks are found to be cracked** and cannot be used.
   How many usable bricks are left?
