What I Should Already Know

Understand and use the 4 points of a compass (N, E, S & W)

Know that when using co-ordinates, the bottom comes before the side

To be able to describe and add labels to maps

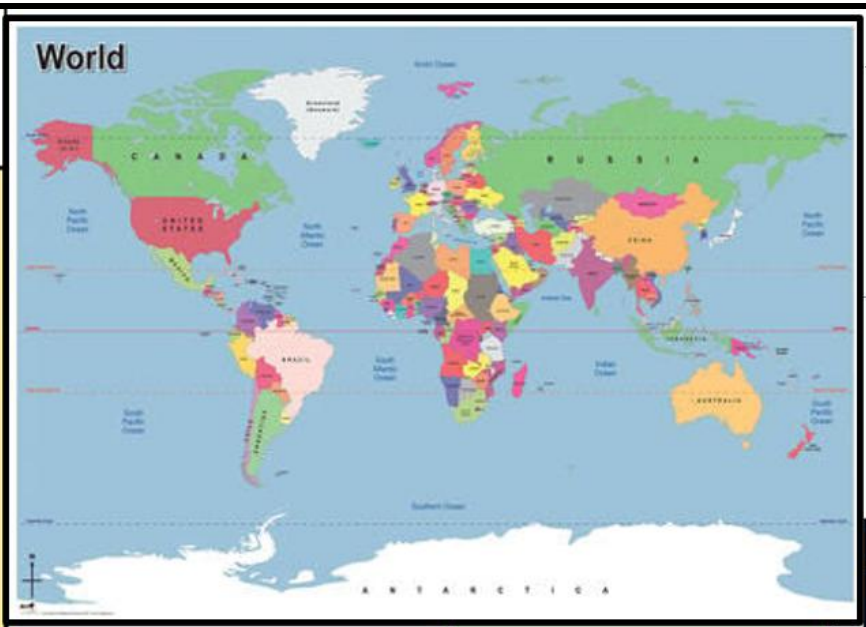

KEY KNOWLEDGE

Co-ordinates are a set of numbers or numbers and letters together that show you a position on a map. They are written in brackets and separated by a comma: (H,4), identifying the horizontal location, before the vertical location. For example, the fire station above is at (H,4).

Healthy Humans
Autumn 2

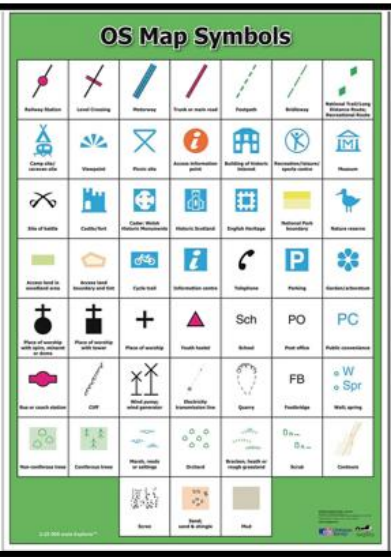

KEY PEOPLE

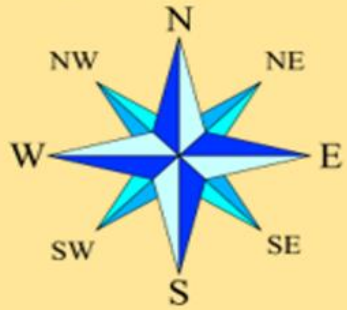

- A cartographer is someone who draws or produces maps.
- James Cook (1728 – 1779) was a British explorer and cartographer.
- Today, technology helps to produce maps using photographs and videos of the area.
