

Caterpillars learning

What a busy month Caterpillars class have had. We've been watering the fruit and vegetables in our wildlife area and digging up potatoes too. We've been looking for minibeasts in the garden and now we have caterpillars in our classroom, just beginning to change into butterflies. We have been artists too, painting, drawing and printing. We've enjoyed stories and songs every day too.

Sun safety

While we enjoy the sun, hats and caps and water bottles are needed every day please!

Butterflies learning

Our big story this month is the Very Hungry Caterpillar—we love it! We have been discussing and ordering the caterpillar to butterfly life cycle and talking about how we grow and change too. We've also been lucky enough to enjoy some more visits to the local shops and our pond. We've been working hard to be more independent in our classroom and every Thursday we've been building up our physical skills with Coach Fin. Lots of teachers are visiting from 'big school' too.

Thinking how to keep busy over the summer? Take a look at the Family Hub stay and play sessions. See our Facebook page .

Thanks for your parent survey responses—there's still time to return them .

June Superstars!

Ermias - saying new words
Zuri - settling into nursery so well
David - very kind to his friends
Eagan - amazing at joining in group time
We are proud of you all!

School leavers going to Primary school

If you have dates to visit your new primary school please let us know.

Many local primary schools are coming to meet the children in nursery too.

**Leavers Celebration will take place on
Wednesday 15th July**

Keep the date - invite coming soon!
