	- Review the composition of the numbers 6 to 9 as '5 and a bit' - Compare numbers using the language of comparison and use the symbols $<$ $>$ $=$ - Review the structure of even numbers (including exploring how even numbers can be composed of two odd parts or two even parts) and the composition of each of 6, 8 and 10 - Review the structure of odd numbers (including exploring how odd numbers can be composed of one odd part and one even part) and the composition of each of 7 and 9. - Consolidate their understanding of the numbers 10 and 20 as '10 and a bit' - consolidate their understanding of the linear number system to 20 and reason about midpoints		- explore how the numbers 6 to 9 can be doubled using the '5 and a bit' and '10 and a bit' structure - Use doubles to calculate near doubles - Use bonds of 10 to reason about bonds of 20, in which the given addend is greater than 10 - Use known number bonds within 10 to calculate within 20, working within the 10-boundary. use their knowledge of bonds of 10 to find three addends that sum to 10 - Use their knowledge of the composition of numbers within 20 to add and subtract across the 10-boundary. - Use their understanding of the linear number system to 10 to position multiples of 10 on a 0 - 100 number line and reason about midpoints		- Continue to explore a range of strategies to subtract across the 10-boundary - Review bonds of 20 in which the given addend is greater than 10, and reason about bonds of 20, in which the given addend is less than 10 - Practise previously explored strategies to support their reasoning about inequalities and equations - Review doubles and near doubles and transform additions in which two addends are adjacent odd/even numbers into doubles. consolidate previously taught facts and strategies through continued, varied practice
