

Mrs Madden's Class News
Friday 23rd January 2026

This week, the children have been learning about birds. They have been finding out which birds visit our school grounds and discovering fun facts about them. They watched the birds in the woodland area during Forest School and during outside play.

In Maths, the children have been making towers using cubes ensuring they had the correct number of cubes for each tower. This also worked their fine motor skills to click to cubes together.

Thank you so much for those who sent in clean wellington boots in for Forest School, it was so much easier to get them ready this week as a result! If possible, could the girls wear trousers on a Friday as they wear waterproof trousers and trousers underneath would be easier. Thank you!

The diary is open for Secret Storytellers!
If you would like to come and read a story or two, drop me a note on Tapestry and we can get it organised.

Have a wonderful weekend.

Mrs Madden 😊
