Learning about photography

Photography is a way of making a picture using a camera.

-There are lots of different photography devices (things that we can take photographs on).

e.g. smartphones, digital cameras and tablets.

-There are also lots of different subjects we can take photos of: e.g. a selfie, an action shot, or a beautiful scene.

How to take a photograph

- 1. Hold the device firmly with both hands
- 2. Point the camera at the subject.
- 3. Look at the viewing screen.
- 4. Move the device to get the shot that you want.
- 5. Press the capture button.

Choose landscape or portrait.

Images - real or fake

- -There are lots of different ways that images can be changed. Sometimes it is hard to tell whether a photograph is real or has been changed.
- -The software for editing photographs is becoming better, and people are getting more skilled at using it.
 - -People may change a photograph to make it look as though it is real, but in fact it is edited
- -They may do this to try and advertise a product or present something in a different way. Do not always believe what you see!
