How will decisions be made about how much/what type of support my child will receive? How will I be involved in discussions about and planning for my child's education	<ul style="list-style-type: none"> • Our primary aim is to enable children to fully access the curriculum as independently as possible and to develop key skills and self-help strategies to support life-long learning, effective socialising and general well-being. • Our aim is for all children to reach their full potential. • If your child is not making the expected progress in any area of development, you will be involved, alongside the class teacher and SENDCo if required, in collaboratively discussing and putting in place, appropriate support strategies, which are then regularly reviewed and developed to meet your child's needs. • The children's views (where appropriate) are also taken into consideration when putting together any additional support programmes. • The school will endeavour to implement any advice received from outside agencies and review this according to the assess-plan-do-review cycle. (see the SEND Policy) • If your child requires a needs assessment for an Education, Health and Care plan, the Local authority SEND team will assess all relevant paperwork sent in and make a judgement of the level of need that is then recommended to support your child.
