

## Teacher notes

# Grammar Revision Tarsia Game: Year 5

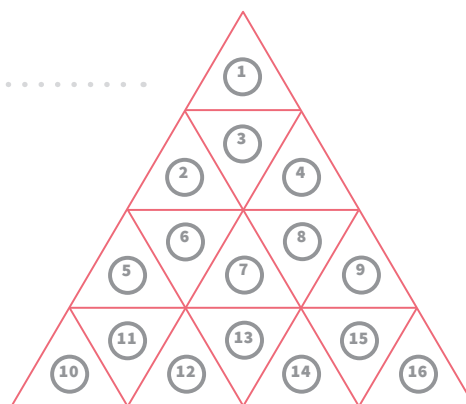

*A tarsia is a simple jigsaw puzzle which children solve by matching up sides of equilateral triangles so that they correspond with each other. When the tarsia is assembled correctly, it will form one, giant triangle.*

## The resources included in this pack are:

- Tarsia pieces for three puzzles
- Teacher's answer sheet
- Tarsia pieces without model sentences
- Blank tarsia template

### How it works

Children need to match grammatical terms with model sentences to complete three separate puzzles.

### Extra challenge

Also included in the pack are tarsia pieces with the grammatical terms only, so children can come up with their own model sentences and create new puzzles for their classmates, as well as a set of blank pieces for pupils to use for any kind of challenge.
