

Year 6 Home Learning – Half Term

As discussed during parents' evening, this half term we have had a strong focus on fractions, decimals and percentages.

As we are now at half term, these activities, along with spelling practice and Reading Plus, can be completed little and often across the break.

Maths Practice (Fractions, Decimals and Percentages)

- FDP Matching Game (NRICH)
- Matching FDP Equivalents (Wordwall)
- Percentage Bingo (Math Playground)
- Converting Fractions to Decimals (Mathsframe)
- Fractions to Percentages (Mathsframe)
- FDP Conversions Practice (Transum)

Children are familiar with these from class and should be able to access them independently. Short, regular practice (10–15 minutes, a few times a week) will have the greatest impact.

Spelling Support

The Year 5/6 statutory spelling list has been provided along with suggested strategies. Regular, focused spelling practice will make a noticeable difference.

Thank you for your continued support.

Mrs Callender
