

Number formation rhymes.

Lets all draw the number 1, once learned never forgotten.
It's one straight line from top to bottom,
and now you've seen just how its done,
you'll always know how to draw the number 1.

Lets all draw the number 2, let's keep up the pace.
Round and down, then across the base,
that's truly all you need to do.
Now you know how to draw the number 2.

Lets all draw the number 3, we're going to tell you when.
Go around in a curve then around again,
and if you're stuck, then copy me.
I'll show you how to draw the number 3.

Lets all draw the number 4, try and copy mine
Draw down and across, then cut the line.
It's never going to be a chore.
Now you know how to draw the number 4.

Five! Don't let the party stop.
Draw and then around and across the top.

Six! We're cock-a-hoop
Start with a curve and go around the loop.

With 7, no need to wear a frown.
Draw one flat line and one line down.

Lets all draw the number 8, let's get this off the ground.
Start with an S, then loop back around.
It's always going to turn out great.
Now you know how to draw the number 8.

Lets all draw the number 9, we're really going to town.
Start in a loop, then one line down.
This is those two combine.
The easy way to draw the number line.

Lets all draw the number 10.
Draw a 1 and an oval then.
Do it once, you can do it again.
Now you've learned how to draw the number 10.

Practice your numbers on the line.
