

Dear Parents and Carers,

We are excited to share that our spelling game 'Morphs' is now live and can be used with your child at home.

What is Morphs?

Morphs is an adventure spelling game set after **Professor Grubwell's Shrink-o-Tron** accidentally shrinks humanity to microscopic size. People now live underground, among roots, rust and towering insects, in a new home called the Colony.

Children play as Morphs, young explorers and builders who gather resources, explore their surroundings and help the Colony grow stronger.

Progress is powered by spelling. Each level teaches a specific morpheme (for example, <ment>) with a short tutorial video, then children use it in gameplay to earn resources, customise their character, build their base and defend themselves against giant bugs.

Morphs is designed to **align directly with the Spelling with Grammarsaurus scheme**, reinforcing the same systematic, morphemic approach used in the classroom. Learning is explicit, structured and cumulative, helping spelling make sense for all learners.

Assessment and the Morphs Heatmap

Every response feeds into a unique **spelling heatmap**, clearly identifying gaps in a child's knowledge and linking directly to targeted support materials. This makes Morphs a powerful assessment and intervention tool, particularly effective for children with SEND, especially those with specific literacy difficulties.

It is important that when your child is playing Morphs that you do not correct them as this will skew the heatmap's data. The data will be used by your child's teacher to assess their progress and they may be sent home with additional support materials aligned to their common mistakes or misconceptions. Encouraging your child to watch the learning videos will also help support them with spellings they are finding tricky.

'How to use' guide

Below is a simple step-by-step guide to help you get started.

Before logging in

If you are playing on an iPad or iOS device, download the app from the App Store – search for 'Morphs Spelling Game'.

You can also use a laptop, desktop or Chromebook by using the URL below.

Ensure your volume is turned up and you have a good internet connection.

Step 1 – Go to the website

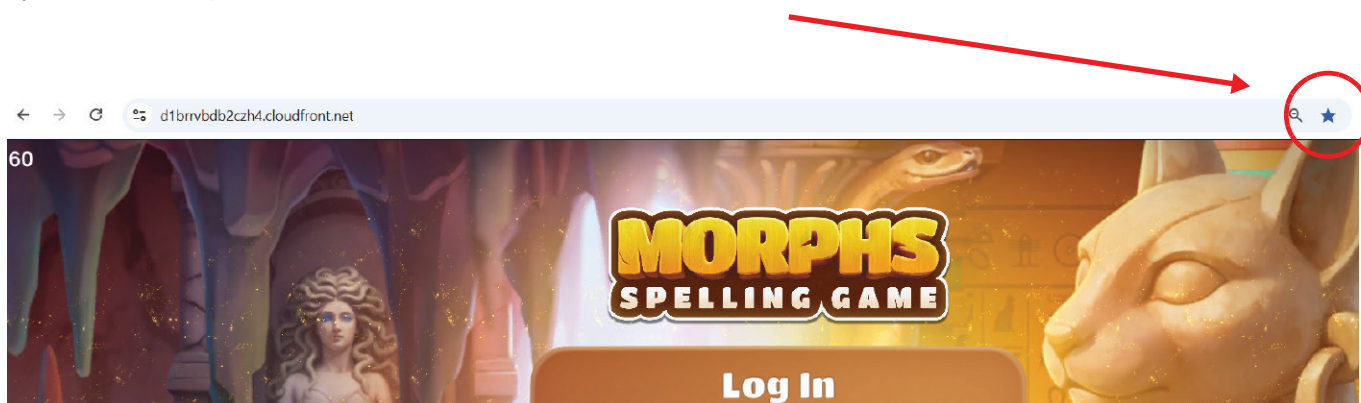

Please begin by visiting the following website:

<https://spelling.info/>

Step 2 – Log in

Once you are on the website, log in using the username and password that your child's school has provided. If you are unsure of the login details, please contact the school and they will be happy to help.

We recommend you bookmark or save the URL in another way to make access for your child quicker in the future.

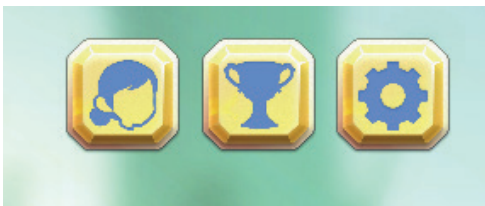

Step 3 – Navigate the Colony

After logging in, you will see your child's dashboard or the 'Colony'. From here:

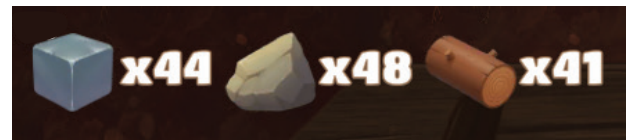

- They can use the buttons at the top right of the screen to:
- Face button - customise their morph (avatar).
- Trophy button - see the leaderboard and compare their score with other players in their class.
- Cog button - change sound settings or log out.

Clicking on each of the rooms will also show their individual functions.

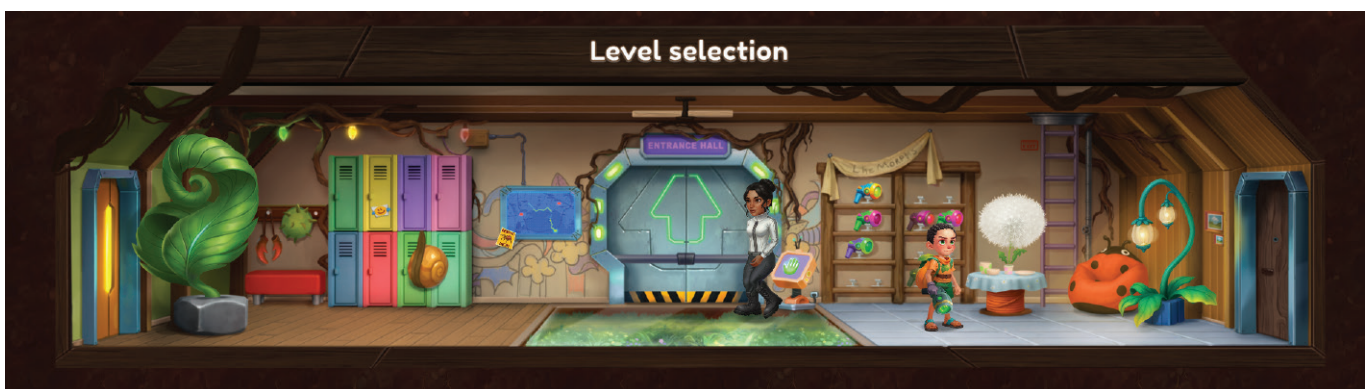

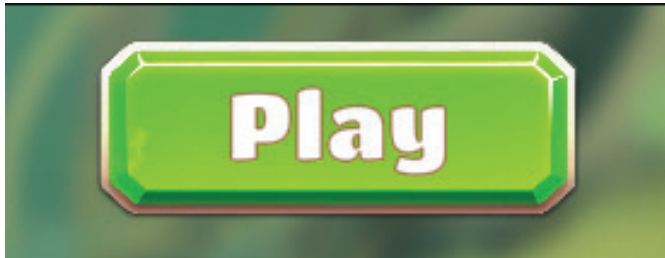

In the Colony area, children can upgrade and repair rooms when they have collected enough resources. The resources are collected by playing the games and they can be found in the top left corner.

Step 4 – Play the game

Children can click 'Play' or the door in the 'Level selection' room to begin playing.

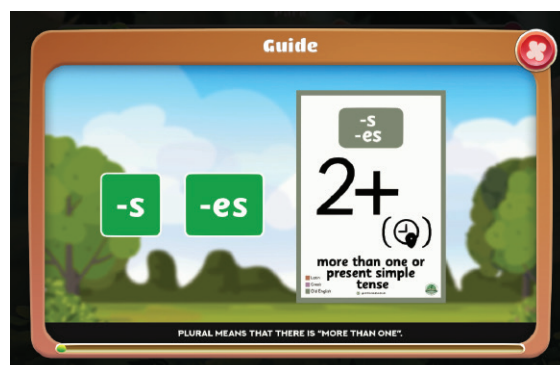

They will then see the game map. Locked levels will be covered by clouds. Click the level image your child wishes to play and then click 'Play' on the pop up.

They will now begin the mini-game. Click the '?' for a video that explains how to complete the mini-game.

Click the 'i' for short a video explaining the morpheme being used in the game.

Click the speaker symbol to hear the word again.

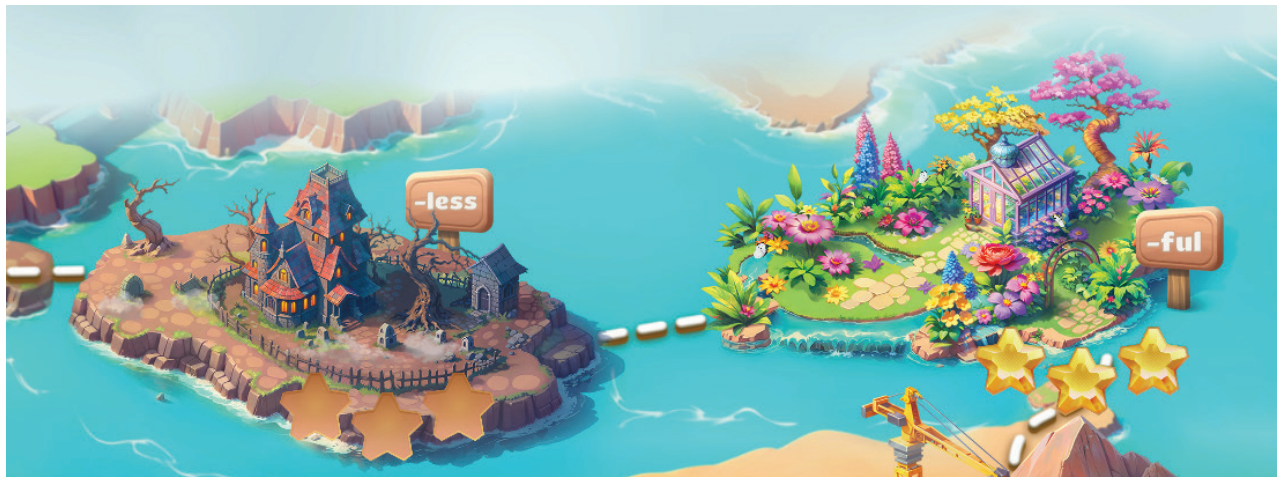

When they have defeated the 'boss' and completed the level, they will be given a feedback pop up of the correct and incorrect spellings. Your child will also get a star rating for that level and information about how many resources they collected.

Click 'Continue' to find a new level revealed on the game map.

Repeat the above steps for all other levels. Your child can repeat a level as many times as they need.

Use the back arrow to return to the 'Colony'.

How you can support your child

- Encourage them to watch the information videos.
- Remind them to listen to the instructions and read each word carefully.
- Talk with them about the morphemes they notice.
- Praise their effort, even if they find some words tricky.
- Do not correct your child before they submit their answers as this will skew the data of the heatmap.
- Short, regular practice works best.

Using Morphs together at home is a great way to build confidence and improve spelling in a fun and engaging way.

If you have any questions or need support with logging in, please do not hesitate to get in touch with your child's school or class teacher.

Kind regards,

Team Grammarsaurus
