We Love maths!

This week in our maths sessions we have been learning all about the number **6**. We have started to use the word **subitise**. When we subitise, we can see and say how many there are without having to count. This is just like when we play a game, roll a dice and can say the number without counting the spots. We have been practising our subitising skills by playing board games with our friends.

Playing dice games is a super way to practice mathematical skills at **home**. It is also a fantastic way to learn about rules and turn taking. We would love to see any pictures of you playing dice games at home on **Seesaw**!

Phonics workshop for parents

We would like to invite parents and carers to a phonics workshop at **2:45pm on Wednesday 19th November** in the school hall. We will be sharing information about how we teach phonics in school and how you can best support your child with their reading at home. For parents who can not attend, please check the school website after the meeting to see supporting materials.

Numberblocks

Numberblocks is a fantastic programme for supporting mathematical development in the Early Years. You can watch episodes on BBC iPlayer. There is also a super Numberblocks App that is available to download to help children practice their early number skills.
