

The Classroom

We sit at group round the tables several times a day. Depending on the child's needs they will have a chair that suits them. Each child has their own belonging box so they can learn independence skills of putting away and collecting their own belongings. We have a visual timetable above the smart board to show either the morning or afternoon. The smartboard also has a large symbol of what is happening now. We have many other symbols around the room such as a drink on the cupboard and toilet by the door.

Choose Room

This space is used throughout the day for play, regulation breaks and quiet time. We have shelves with a variety of different recourses that can be brought down to play with. We have a good variety of OT equipment including the lycra cube, peanut ball and deep pressure roll, these support the pupils in regulating. We will often extend our learning in to this room e.g. if we are looking at shapes in the classroom we will also have a variety of shape resources set up in here.
