

# Spring Newsletter 2026

Welcome back & Happy New Year!

Our new topic for the Spring Term is Rainforests! We will be finding out about where the different rainforests are in the World and why it is important to help to save our rainforests. Children will also enjoy finding out about the different animals that live in the rainforests and their habitats. We will learn about some of the different plants and animals and find out about David Attenborough and his fantastic work!

During the term we will explore plants and carry out investigations to find out how they grow. In Maths we will be looking at Calculations, focussing on Addition and Subtraction & Measurement. Our text focus in Literacy will be Information Books, Stories and Poetry.

Wendy & our Therapy Dog Lexi will continue to come in during the term, and towards the end of term, we will enjoy some Easter arts and crafts activities.

This term we will have Shadow Dance with Lucy on a Thursday & will be going to Wythenshawe Park to ride the bikes on a Friday 😊 We will continue our cooking sessions, where we will look at healthy lifestyles and the different food groups. If possible, please can you donate £1 per week to help with the costs of buying the ingredients.

We will continue to go into the Forest on a Wednesday. If you haven't already done so, please can you send in wellies & warm waterproofs for these sessions.

If possible, please could you send a spare set of clothes to leave in school, we are finding lots of us are getting wet socks and trousers when playing outside!

If you have any questions, please get in touch via Class Dojo or e mail
