

Key Instant Recall Facts – Year 6, Autumn 2

I know the multiplication and division facts for all times tables up to 12×12 .

By the end of this half term, children should know the following facts. The aim is for them to recall these facts **instantly**.

Please see separate sheet for all times table facts.

This is a chance for Year 6 children to consolidate their knowledge of multiplication and division facts and to increase their speed of recall.

They should be able to answer these questions in any order, including missing number questions e.g. $7 \times \bigcirc = 28$ or $\bigcirc \div 6 = 7$.

Children who have already mastered their times tables should apply this knowledge to answer questions including decimals e.g. $0.7 \times \bigcirc = 4.2$ or $\bigcirc \div 60 = 0.7$

Key Vocabulary

What is 12 **multiplied by** 6?

What is 7 **times** 8?

What is 84 **divided by** 7?

Tips to support learning:

- Times Tables Rock Stars – regular practise.
- Think of the question – One player thinks of a times table question (e.g. 4×12) and states the answer. The other player has to guess the original question.
- Speed challenge – use a deck of playing cards with Kings removed. Ace = 1, Jack = 11 and Queen = 12. Turn over two cards and multiply. How many can your child get right in 2 minutes?
