World History Timeline																														
360,000,000 BC – Dinosaurs began																														
240,000,000 BC – Dinosaurs disappeared																														
2,000,000 BC – Humans came into																														
500,000 BC – Discovery of fire																														
5,000 BC – Neolithic period begins.																														
3,200 – Ancient Egypt united as two																														
2,800 BC – Stonehenge created																														
2,100 BC – Bronze Age begins																														
1,000 BC – Celtic customs and artefacts used in Britain																														
700 BC – Iron Age begins																														
55 & 54 BC – Julius Caesar invades Britain																														
105 AD – Invention of paper (China)																														
410 AD – End of Roman Britain																														
450 AD – Anglo Saxons invade.																														
793 AD – Vikings invade for first time.																														
1066 AD – Norman invasion																														
1485 AD – Tudor Britain																														
1605 AD –Gunpowder Plot																														
1666 AD – The Great Fire of London																														
1837 AD – Victorian Britain begins																														
1914 – 1918 AD – WW1																														
1939 – 1945 WW2																														
1969 – Apollo 11 - First man to land on the moon																														
1983 – Invention of the Internet																														
2,000 AD – New Millennium																														
Lady Mary Wortley Montagu—brought inoculation to Britain.																														
	George Stephenson's locomotive.																													
Augusta Ada King, Countess of Lovelace first computer programmer.																														
	Alexander Graham-Bell invented the telephone.																													
The first military tank—Ernest Swinton																														
	John Logie-Baird—the first ever																													
The modern nappy Valerie Hunter-Gordon																														
	The first cyclone vacuum—Sir James Dyson.																													
Emily Jayne Cummins—invents to solve World problems.
