

Crack the code cyber-crime investigators!

On Wednesday 15th October the children in all of Key Stage 2 took part in a STEM afternoon where they had to use code cracking skills and knowledge to break the codes to get into the secret briefcase! In the briefcases were the codes needed to stop the cyber-hackers and save the internet!

The children worked really well together in mixed ability and mixed age groups. They showed fantastic problem-solving, team-work, thinking outside the box skills and perseverance.
