

Friday 11th September 2026

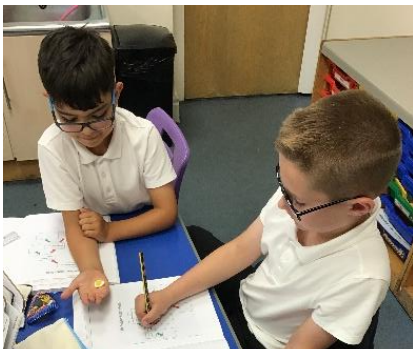

This week class 2 have worked hard and are settling well into their routine. Thursday was exciting as Y4 restarted their swimming sessions and Y3 experienced their very first swim lesson with school! Everyone was very brave and tried their best and our older children set a really good example to our younger children. We can't wait for next week!

In English, we have been practising writing skills ready to use later when creating our own magazines, including 'adverbials' to describe when, where and how and using conjunctions to make more complex sentences.

In maths we have started learning about Place Value. Y3 have been learning place value of 3-digit numbers and Y4 have been learning the place value of 4-digit numbers.

In science, we have started to understand the term 'classification' and have practised using simple classification keys to sort and classify different Haribo sweets by their properties. As a reward for showing good teamwork, we even got to eat some of our sweet treats!

We have started to learn about what life was like in 'Stone Age Britain' as part of our history work. To do this, we enjoyed a bit of role play outside to help us to understand how and why people in Stone Age Britain changed from being 'hunter-gatherers' to farmers.

In RE we have been thinking about the idea of 'good overcoming evil' and children were able to share some examples of where we see 'goodness' in the world around us, including recycling, helping others who are in need, donating to charity and looking after our planet
