

Another busy week in Class 3! In maths, Year 5 have been developing their understanding of rounding, working with increasingly large numbers all the way up to 1,000,000. They have worked hard on deciding which multiple to round to and explaining how they know. Year 6 have now moved onto factors, identifying factors of different numbers and using their multiplication knowledge to help them work efficiently.

In English, we have continued our work on The Nowhere Emporium. This week, we focused closely on Lucien Silver, creating detailed character profiles using evidence from the text. We then had some brilliant discussions about whether Lucien is ultimately good or evil, with the children having to justify their opinions rather than simply choosing a side.

Our Anglo-Saxon work has become very practical in DT, as we have started constructing Anglo-Saxon houses from wood. A big focus has been making sure measurements are accurate and that our houses are properly scaled.

PE was particularly frenetic this week, with lots of movement and teamwork! Finally, in PSHE, we explored friendships and became advice-givers, suggesting thoughtful ways to deal with different friendship problems and disagreements.
