

Week Beginning: 14th September 2026

Another fabulous week in Reception, Year 1 and 2 where children are now really settled in their year groups. We have also had the pleasure of welcoming a new child to our Year 2 cohort.

This week Reception have made super progress with recognising some phonemes. Already children are recognising s / a / t / i / n / taught in their phonics lessons in different context. They have helped the older children sound out some words for the Year 1's and 2's that they have used in their writing about Harry the Happy Mouse.

Some examples of our amazing Year 1 writing.

In maths the Key Stage 1 children have been learning about place value, partitioning numbers into tens and ones.

Reception have been practising counting to 10 already and counting back from 5. The children have done really well with their counting already. This week we have finished making our own speckled frog masks and used them during maths lessons.

In RE we have been learning about Christianity and how they believe that God created the universe in a series of events of days. The Reception children also thought about how to care for our planet and sorted pictures into 'caring' and 'uncaring' for our planet.
