

Week Beginning 21st September 2026

Another jam packed week in Class 1 with lots of learning taking place. The Reception children seem to have settled really well now and they have begun this week to carry out some EYFS challenges.

The Reception children this week have practised writing the letters they have learned in phonics - S / A / T / P / I / N / M

The children have written these letters in shaving foam, sand and then finally some children have had a go with pencil and paper. They have also done fantastically with their counting. They have completed number hunts, counting farm animals, moving tiny pom poms into numbered circles and counted on our interactive whiteboard.

Children this week have thought about their emotions in PSHE, listened to and acted out Christian stories (Jonah and the whale) and practised their ball skills in P.E.

The Key Stage 1 children have continued to work very hard. It is quite a tricky transition to move from Reception which is learning through play to the slightly more formal teaching of Year 1. The Year 1's are doing so well, they have made all the Class 1 staff proud this week!

Both Year 1 and Year 2 have continued learning about Harry the Happy mouse and we have written several thank you notes to the characters. In maths we have been tackling partitioning into tens and ones which is quite tricky for the Year 2's.

In Geography we have been looking at our local area and we have made several trips outside to view the surrounding landscape. We noticed human features such as farm buildings, windmills and roads. We noticed physical features like hills and moorland.

Our nature table
is very popular!
