

Friday 2nd October 2026

In English, we have tried hard to create our own magazine articles about the Loch Ness Monster. Working independently can be a challenge but with lots of practice, we will keep improving!

In maths, we have continued our Place Value work with a focus on rounding numbers to the nearest 10, 100 and 1000. In arithmetic, we used our skill of multiplying by 10 from last week to help us to multiply by 100 this week!

In science, we learnt how to sort and classify invertebrates according to their observable features! We sorted different living things into four categories: insects, worm, slugs and snail or spiders. We now know that a spider is NOT an insect as it has eight legs!

In history, we have been learnt about the changes from the Bronze age to the Iron Age. The children loved observing what Iron Age hill forts must have been like. We now know that life improved in the Iron age because they had iron (better tools and weapons), hill forts (better protection from other tribes) and they could trade and sell things they have made using iron rings as currency. The children enjoyed showing off their new knowledge when creating 'Did you know?' fact boxes.

In RE, we completed decorating our Diva lamps, ready to use next week when acting out the festival of Diwali! Look how bright and colourful they look!

Well done to all of the children for remembering to bring in their spelling homework. Please can you make sure their folder is returned every week ready for their next spelling homework to go into.

We have had our first examples of theme homework presented – stone age tools and shelters seems to have been a popular choice this week. We can't wait to see more! Remember to colour in the jigsaw piece to show each task you have completed!
