

It has been another busy week in Class 3, with lots of fantastic learning taking place across the curriculum.

In Maths, Year 5 have been developing their addition and subtraction skills by applying their knowledge to a range of problems. They have worked carefully to decide which operation is needed and explain their reasoning. Year 6 have focused on multiplication and division, including using factor pairs to divide efficiently. The children have shown great perseverance when tackling more challenging calculations.

In English, we have completed our narrative writing using the Chunk a Plot approach. The children have worked hard to develop each section of their story, producing some imaginative and exciting narratives.

Our PSHE work involved role play based around respecting others. The children considered how their words and actions can affect other people and discussed positive ways to respond in different situations.

In PE, we have been developing our striking skills, working on accuracy, control and technique. In History, we explored the fascinating discovery of Sutton Hoo and considered what it can teach us about the Anglo-Saxons.

Finally, Guided Reading has been a real success this week, with some excellent discussion, retrieval and inference work.

Well done, Class 3, another brilliant week
