

Week Beginning 28th September 2026

Another fantastic week in Class 1 with lots and lots of learning taking place! The children have worked so hard all week and all the class 1 staff have been impressed with the children's work ethic.

In Key Stage 1 maths we have been comparing numbers by making practically using resources, drawing the amounts or counting up a number line. The children have learned how to use the greater than, less than and equals signs.

In the Early Years the children have continued to learn how to count to 5 and some children to 10! The children are also learning how to recognise numerals. We have played some new maths games this week which the children have absolutely loved!!

Things for children to practise at home:

EYFS - Counting and recognising numbers to 10 - can they count out 10 conkers? Leaves? Biscuits?

Year 1 and 2 - Practise numerals to 100. Some children are writing 40 for 14, 80 for 18 for example. Children need to practise recognising and writing teen numbers if they are struggling with this.

Fine motor skills and phoneme recognition.

Fine motor skills and phoneme recognition.

Lots of fun activities where children have practised recognising the letters they have learned in these first few weeks of school.

Exploring the pinecone experiment for science.

Exploring the pinecone experiment for science.

This week we have expanded our nature table and made an area for experiments. We have started a science experiment looking at what happens to pinecones in water. The children have been fascinated with the area, both Reception and Key Stage 1 children. Lots of children have made some really interesting scientific observations.

In Science the children have been learning about habitats and animals and plants that live in them. The key stage 1 children have explored different habitats, before sorting a selection of animals and plants into habitat categories. This was a really fun and educational activity for a Friday afternoon.

Dough Disco!!
