

Friday 9th October 2026

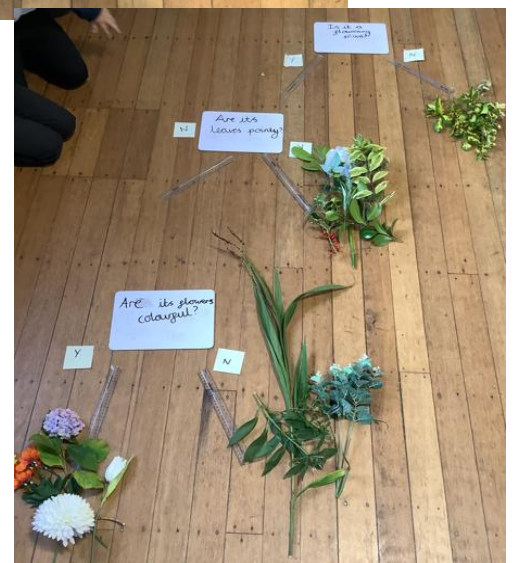

In English, we have been reading 'The Treasure of Loch Ness'. We have been practising our descriptive skills, ready to write our own description of Nessie.

In maths, we have just moved onto our addition and subtraction work. Y3 are trying to apply known facts to help them to calculate with large numbers whereas Y4 are trying to look at numbers more carefully before choosing an efficient method to find the answer quickly and easily.

In science, we have applied our classification skills to group plants by their observable characteristics. We worked together to create a huge classification key and turn turns to sort the different types of plants. We started by deciding if the plants were 'flowering plants' or 'not flowering plants' Take a look!

In RE, we learned more about the Hindu traditions of celebrating Diwali, the festival of light, by experiencing it for ourselves! Together, we lit our diva lamps and thought about the ones we loved, asking for goodness to come to those we love, like Hindu's would at the temple. We then put our diva lamps out in the classroom to welcome goodness into our school. We coloured Mendhi patterns and had some painted onto our hands. We even got to share a sweet treat and watch some fireworks! Afterwards, children thought about where they get their hope and 'light' from in their lives.

Happy Diwali!
