

Mathletics

At our welcome meeting last week there was a question about other activities available on the Mathletics website. We've taken a look and thought we'd share some of the resources available to your child, should you want anything extra on top of the homework we assign each week.

- When we've assigned homework, those tasks will need completing first before any of the other resources can be accessed. An example of how a child's page looks with their assigned 'To-do list' is below:

- Once completed they will be able to access the other tabs at the top of the page:

- Resources** – which includes an A-Z of maths terms, various downloadable eBooks and videos

- Live Mathletics** – Quick fire questions against the clock

- Games** – explore the games available and build up reward points
