Crucial Curriculum Content

- To develop an understanding of how plants grow by planting seeds and caring for growing plants.
- Know what plants need to grow.
- To make observations and talk about things that grow and changes they observe.
- Understand the need to respect and care for the natural environment.
- To understand the key parts of a life cycle.

Key knowledge

- I know plants and flowers grow from seeds and bulbs
- I know that I can help a plant grow by giving it water, light, and care.
- I know that plants grow leaves, stems, and flowers.
- I know a plant has a lifecycle e.g., seed, root, shoot, flower
- I know how to look closely and notice changes in a plant using words like taller, greener, bigger, or opening.
- I know that I can care for nature by not picking flowers or hurting living things.
- I know that throwing rubbish in the bin helps protect the environment.
- I know that watering plants, not stepping on them, and being gentle shows respect for nature.
- I know that we share the environment with animals, insects, and other people.
- I know the key parts of a life cycle of a plant.
