

SPEAK LIKE AN EXPERT

SCIENCE - THE HUMAN BODY

HOMEWORK TASK

Prepare a presentation (up to 2 minutes long) to give details about an aspect of the human body.

You could choose questions such as:

How do muscles work?

What happens when broken bones repair themselves?

What is skin and why is it important?

How do white blood cells work?

OR you can come up with any question of your own.

Developing Experts have been so impressed with these over the last few years that they actually add them as a special lesson, with all the videos of our presentations (if you want them to be on) on their website!

Presentations will be performed, in front of the class, on Friday 16th December.
