

Social distancing

People are talking about something called Coronavirus. Coronavirus spreads very easily. Social distancing is a way I can stay healthy and safe.

Social distancing means I cannot stand too close to people who I do not live with. It is ok to be close to people who live in my house. But I need to stand 2 metres away from others. My parents and teachers will show me how far away I need to be from other people.

I will have to keep a safe distance when I am on the bus in the classroom and playground or in the shops. This means when I am at school I will need to do my best to remember to stand and sit further away from my friends and teachers. This will be different from what I usually do in school.

I can help by listening to my teachers about where I need to stand and sit.

When I do what my teachers say it will help keep everyone safe.
