

My social distancing story

People are talking about something called Coronavirus

Coronavirus spreads very easily. I need to wash

my hands so that I stay healthy.

Social distancing is a way I can stay healthy and

safe.

Social distancing means I cannot stand too close to

people who I do not live with. It is ok to

be close to people who live in my house.

But I need to stand 2 meters away from others.

My parents and teachers will show me how far

away I need to be from other people.

I will have to keep a safe distance when I

am on the bus, in the classroom and playground

or in the shops. This means when I am at

school I will need to do my best to

remember to stand and sit further away from my

friends and teachers.

This

will

be

different

from

what

I

usually

do

in school.

I can

help

by

listening

to

my

teachers

about

where

I

need

to

stand

and

sit.

This

will

make

my

teachers

proud

and

keep

everyone

safe.
