

Year 6

Spring Term One Homework Project

Cities of the World

I would like you to research some of the major cities in our world.

It could be a capital city or just one of the larger cities in any country. What would you find there? What is its population? When did people first settle there? What are its most famous physical or human features?

1. You could create a map of a country's or even the world's major cities.

2. You could research a specific landmark within a city and write interesting facts about it.

Or you can do something that you have thought of yourself. Just make sure that you have information about what ever you create so that you can present it to the class. I cannot wait to see what your presentations.

Please hand them in by **Wednesday 11th February.**
