

Year 4

Summer Term Two Homework Project
Environmental regions

It is time to get creative year 4. I would like you to use materials that you have at home to create one of the following:

1. Make a model/map of the world highlighting each environmental region.

 Equatorial	 Arid	 Mediterranean	 Snow	 Polar	 Temperate
Tropical warm and wet	Deserts hottest and driest regions with little or no rainfall	Hot dry summer winter is cooler with some rainfall, but hardly any frost	Long cold winter summer is short with rapid changes in the spring & autumn	Very, very cold cold as -60 °C in Arctic -80 °C Antarctic	Warm or hot summer slightly colder winters

Or create your own idea as long as it is related to environmental regions!

2. Create a poster or PowerPoint detailing which species (including humans) are better suited to which environmental regions and why.

3. Detail the environmental regions of Russia focussing on how might life differ for people living in the western and eastern parts of Russia?

- Herzegovina
- 8. Czechia
- 9. Slovakia
- 17. Lebanon
- 18. Guinea-Bissau
- 19. Guinea
- 26. Cambodia
- 27. Panama
- 28. Malawi
