Archaeologist

An archaeologist studies objects and remains from long ago.

Settlements

A settlement is any place where a group of people lives. It can be small (like a hamlet or village) or large (like a town or city).

Historian

Someone who studies and knows a lot about things that happened in the past.

BC

BC stands for "Before Christ" and is used to show years that happened a long time ago, before Jesus Christ was born.

AD

AD stands for "Anno Domini," which is Latin for "in the year of our Lord.

Art Fridge Words

Post-impressionist

Post-Impressionist artists aimed to make art an emotional experience through the use of symbolism, colour and captivating forms. Post-Impressionist artists commonly used rural scenes and everyday subjects for their paintings in contrast to the high fashion urban scenes of impressionism.

Texture

Texture refers to how something feels, including its appearance and consistency.

Tone

How light or dark something is.
