

What journey do rivers go on?

Geography Knowledge Organiser

Can you create a 3D model showing some of the key features of rivers?

Key Vocabulary

Water cycle:
evaporation,
condensation,
precipitation, collection

Rivers of the World:
Frome, Severn, Thames,
Nile, Amazon, Loire,
Seine

Features of a River:
source, mouth, tributary,
meander, flood plain,
estuary

Key Knowledge: The World's Rivers

The River Severn in Britain's longest river.

The River Thames flows through London.

The Seine flows through Paris.

The Loire is France's longest river.

The Amazon is the world's longest river, has the largest volume and is located in South America.

I know the Nile is the world's second longest river and is located in Africa.

I should already know

The world's continents and oceans.

Features of a River

Can you visit a local river and record some of its key features through sketches or photographs?
