

# Amazing Light

## Science and Faith Workshop

### Amazing Light

Amazing light is a travelling workshop for primary schools. Originally set in a pop-up science tent but now often in the school hall, children investigate the extraordinary nature of the physics of light and how light is used as a metaphor for 'Jesus is the light of the world.' The children asked and were also asked questions about the metaphor 'Jesus is the light of the World' and then use some of the scientific words about light to write a pyramid poem and use it to create an acetate-stained glass window.

**Grant funded by ECLAS Scientists in congregations**
