

# Year 1 - Spring 2

## Dinosaurs Knowledge Organiser

Mary Anning was born in 1799. She was a famous fossil hunter who lived in England near the south coast, known as the Jurassic Coast. Her father taught her how to get fossils out of the rock by using a chisel and hammer. In 1810, she found a giant fossil of an Ichthyosaurus.

Tyrannosaurus Rex

Velociraptor

Spinosaurus

Stegosaurus

Parasaurolophus

### Crucial Curriculum Content

- To know that dinosaurs were alive
- To know who Mary Anning was and why she was important
- To investigate how dinosaurs died

### Sticky knowledge about dinosaurs...

- |  |   |
|--|---|
| • Dinosaurs lived for around 160 million years (people have only been around for about 2.5 million years). | • A T-Rex bite was more than twice as powerful as a lion's bite.          |
| • Some of the largest herbivores had to eat a tonne of food a day (a bus-load of vegetation!).             | • The fastest dinosaur, Ornithomimus, could reach speeds of up to 43 mph. |
| • A newborn baby has a bigger brain than most dinosaurs had.   | • The word 'dinosaur' comes from Greek, meaning 'terrible lizard'.        |

### Timeline of the Dinosaurs

#### TRIASSIC PERIOD

248 – 206 million years ago

Pterosaurs first appeared in the Triassic Period!

#### JURASSIC PERIOD

206 – 146 million years ago

Stegosaurus, Brontosaurus and Allosaurus lived in this period.

#### CRETACEOUS PERIOD

146 – 65 million years ago

Tyrannosaurus Rex, Velociraptor and Triceratops lived in this period!

### Topic vocabulary to learn...

Dinosaur

A group of reptiles that dominated the land for over 160 million years. They lived in prehistoric times.

Pangea

Where all the continents joined together to make a supercontinent, over 200 million years ago.

Extinct

Where an animal completely dies out and is no longer on Earth.

Fossil

The remains of an animal preserved in rock.

Herbivore

An animal that feeds on plants.

Carnivore

An animal that feeds on other animals - a meat eater!

Omnivore

An animal that eats a variety of foods from both animal and plant origins.

Reptile

A (normally) cold blooded animal with dry scaly skin that lays eggs.

Excavate

When earth is dug-up and moved carefully to find remains.

Palaeontologist

A scientist who studies fossils.
