Physical feature	A feature formed by nature (formed naturally)
Compare	What is the same and different about 2 things.

Africa

Africa is a **continent**, not a country

Africa is the second largest continent in the world. Africa is home to the largest **desert** in the world (the Sahara) and one of the world's longest rivers (the Nile).

Because Africa lies on the **equator**, this means that the continent gets lots of direct sunlight throughout the year.

The longest river in the world is in Africa. It is called the Nile.

The Sahara is the largest hot **desert** in the world. It is in northern Africa.

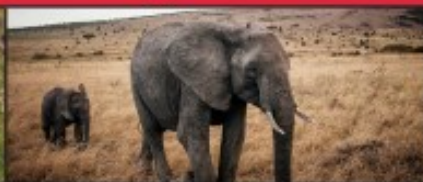

Savannahs, or grasslands, cover almost half of Africa.

The Big Five - the largest and most dangerous African animals

African lion

African elephant

Cape buffalo

African leopard

White/black rhinoceros
