

Maximising our Potential

Wednesday 23rd September 2026

Dear Parent/Carer,

As part of our commitment to supporting students in mathematics, we would like to share some important information about the support and learning opportunities available this year.

SPARX Homework is set for all students every Friday and must be completed by Wednesday each week. If your child experiences any difficulties accessing or completing their homework, they should speak to their maths teacher or attend our SPARX Support Club on Mondays.

During form time each week, students take part in carefully selected numeracy activities designed to address common misconceptions, strengthen key skills and build confidence in mathematics.

A new focus this year is weekly timetables practice. Strong times table fluency is essential for success across many areas of mathematics, including fractions, percentages, ratio, algebra and problem solving. Timetables practice also forms part of your child's weekly SPARX homework.

For our Year 11 students, additional support is available through:

- Weekly GCSE maths revision sessions every Tuesday after school.
- Weekly GCSE practice papers, which students are expected to complete independently to consolidate learning, develop exam technique and prepare for their examinations.

We greatly appreciate your support in encouraging your child to engage fully with these opportunities and complete their homework each week.

Yours faithfully,

C Frodsham
Head of Faculty (Maths)
