

Years 5/6 - Autumn 2

Check our website for the latest news and updates.

Welcome back!

Already we're a full half term down and we're now well into the school year. We've been incredibly proud of how hard all the children in Upper Key Stage 2 are working, coming to school ready to learn every day. Thank you for your support with this - we know the valuable role our families play and want to keep working with you so that all our children can be the best that they can be.

English

In English, we're moving on to another text that links to our learning about the Tudor period, "The Pirate Queen" by Terry Deary. We'll be learning about Grace O'Malley and her adventures as a pirate leader.

Maths

In maths, we're learning about fractions, decimals and percentages for the first few weeks of term. We'll then move onto revising learning around 2D and 3D shapes, as well as looking at presenting and interpreting data in statistics to end the term.

Overview of other subjects

SCIENCE - Earth and Space

COMPUTING - Online safety and databases

GEOGRAPHY - Marvellous Maps

DT - Cross stitch of a family crest

PSHE - Nutrition and Food

RE - What values do people live by?

Things to remember

Home learning should be completed every week by all children. We don't provide much work to be completed outside of school hours, as we believe our students need time to rest, play and pursue interests outside school.

The homework we do provide is to give students extra practice and help them reinforce what they have learned in class. It also teaches responsibility, time-management and independent problem-solving skills that are important for future learning.

Please support us - all homework is due on Mondays.
