

# Seasonal Changes - Year 1

## Key Facts

1	There are four seasons each year, autumn, winter, spring and summer.
2	The weather patterns are different for each season.
3	The length of each day varies depending on the season.
4	There are 12 months each year and they fall under one of the seasons.
5	The weather includes the temperature outside, the wind direction and strength, as well as, rain, cloud, sun and snow.

## Vocabulary

1	Autumn	In autumn, the weather begins to get colder. The leaves start to fall from trees. The amount of daytime becomes less.
2	Winter	In winter, the weather is much colder. Sometimes it is cold enough to freeze or snow. Many trees have bare branches. The daytimes are at their shortest.
3	Spring	In spring, the weather starts to get warmer. Leaves begin to grow on trees and some may have blossom. The daytimes start to get longer.
4	Summer	In summer, the weather starts to get hotter. The days are long and the nights are short. The trees are full of leaves.
5	Daylight	Daylight is when it is light outside. The amount of daylight changes with each season.
