

During History and Geography, we will learn:

- How transport has changed in Padiham
- That there used to be trams in Padiham
- To use directional and positional language
- To use a compass
- What physical and human features there are in Padiham

Throughout this half term the children will be looking at their relationships between themselves and others. Initiating from the place where I live, then expanding outwards. We will hold our own Class 2 Common Wealth Games and draw inspiration from different sports and athletes to make a positive impact on ourselves and our learning. We will discuss having high expectations of ourselves, looking after ourselves and creating friendships.

In Science, we will be looking at the change within the seasons. As we change from Summer into Autumn we will discuss what this means for our world and for ourselves. We will use the blessings that Autumn brings to create artwork inspired by Anne – Marie Foster who uses nature to create prints of her local area. Children will draw from real life, experiment with different lines and use a range of materials to print

Physical feature

Inspirational Person

Alfred Tysoe

March 1874 – October 1901

A Padiham born farm worker turned professional athlete. He discovered his talent at Brooklands School and went on to win two gold medals in the 1900 Olympics.

In Music we will be celebrating the style of South African music. We will focus on finding the pulse of a piece of music, repeating rhythms and being expressive and creative with our voices.
