

Children think and talk like scientists, using accurate and effective vocabulary.

Children build on their prior knowledge, deepening their understanding and fostering long-term retention.

Children will engage and interact with our ever-changing world through a scientific lens.

Children are challenged to ask and answer questions and be curious about their learning.

Teachers and leaders collaborate to use approaches and resources that enable all children to make progress.

Children will engage in practical experiences that inspire them to think like scientists.

## Science at Town Field

Where all children and adults are supported to achieve.
