Autumn 2 2026

Year 2

(Due week beginning 14th December 2025)

Creative Homework – Science Materials

As part of our science enquiry '**Materials** 'we will be looking at different materials, their properties and their purpose. We would love for you to make an object to be displayed around the playground. This could be a piece of art, a bird box, animal shelter, a game or anything your imagination fancies. All we ask is that you think about the properties of the materials you are using. They will need to be waterproof, but what else will they need to be?

If the above task is not what you fancy, then you can create a poster to tell people about the properties of materials. This can be presented in whichever way you like!

Below are some examples to help you with your own ideas. If you need help, please speak with a member of the Year 2 team.

Thank you for your continued support,

The Year 2 Team

Bird box, tin can game, bug hotel, wind chimes, dominoes, board games
