

Go on a mini fieldwork walk together. Notice the things you hear, see, smell and narrate the journey. Collect the fallen leaves and create some leaf art, make patterns or objects, and be as creative as you can!

Acorns and Blossoms

Autumn 2

Boundary Learning Together

Home Activities

We want to encourage home learning for all of our pupils. This additional learning optional.

Any Home learning will be always be celebrated in school!

Please work on your child's NHS Speech, Language and Communication targets through everyday play and interactions – suggestions can be found here:

[How can I help my child communicate with me? - BBC Tiny Happy People](#)

Try dice games to build your child's subitising skills (recognising a number without counting).

 Roll a dice and see if your child can spot the number of dots straight away.

Can they then:

- Do 4 jumps?
- Collect 4 toys or objects?
- Clap 4 times?
- Take 4 steps?

Keep it fun and encourage your child to recognise the amount without counting each dot.

Go on a **Colour Hunt** – Find objects of different colours and shapes around your home or outside. For example:

- Find 3 green things.
 - Find something that is square
 - Find something that is a circle
- Can you create patterns with them?

Look in the mirror often and talk about different facial expressions – Can you show a happy, sad, angry, tired, excited face?

Spend some time together on reading eggs or times table rock star each week to practice your phonics and maths skills at home.
