Talk Assembly: International Women's Day

This week our talk assembly was about International Women's Day. We learned why it is important and how it celebrates women's achievements around the world. We talked about equality, including women's right to vote and the fight led by the Suffragettes, such as Emmeline Pankhurst. We also discussed equal pay and why it is important that everyone is treated fairly.

Finally, we learned about iconic female leaders from the past and present, including Amelia Earhart, who was a famous pilot, and Leah Williamson, who captained England to win the UEFA Women's Euro 2022.

WOMEN'S DAY

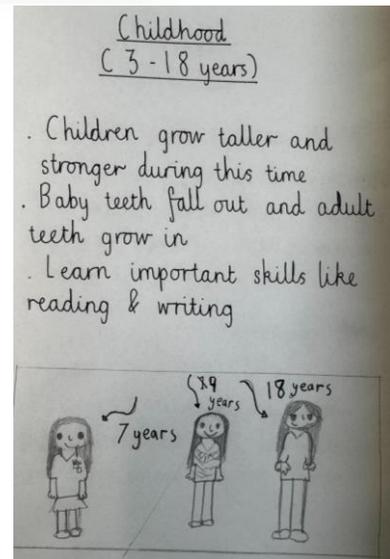

Geography:

In Year 1 this week, we learned about what weather is. We talked about how weather is what the sky and air are like outside each day, such as when it is sunny, rainy, windy or cloudy. The children enjoyed thinking about the different types of weather we see. This piece of work is from Una in Ladybird class. Well done, Una!

Science in Y5

Year 5 have been exploring the fascinating stages of human development, from infancy through to adulthood. Through thoughtful discussions and engaging activities, students have developed a deeper understanding of how we grow, change, and develop physically, emotionally, and socially over time.

Reminder: Please don't forget to sign up for Parents' Evening appointments on 14th and 16th April through School Spider.
