

English

Arthur and the Golden Rope

We will read and explore 'Arthur and the Golden Rope' by Joe Todd-Stanton, using it to inspire our own poetry, descriptive writing, myth narratives and an informative guide.

Science

Electricity

We will explore electricity, learning about key figures such as Thomas Edison and James Watt, and understanding how energy has developed over time. We will identify electrical appliances, build and investigate simple circuits, and learn about conductors and insulators.

Music

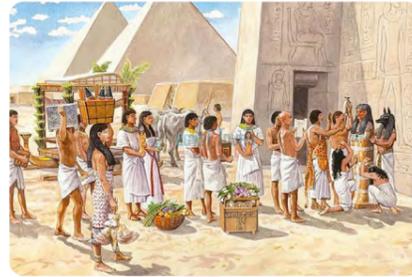

Clarinets and Trumpets

We will continue playing trumpets and clarinets, learning to read and play semiquavers and off-beat rhythms.

History

Ancient Egyptians

We will explore what was important to the Ancient Egyptians, including daily life, farming along the River Nile, the role of pharaohs and the significance of gods and goddesses.

Enrichment

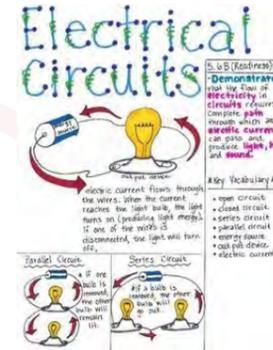

Egyptian Day

We shall be holding a special Egyptian Day to enrich our learning about this period in ancient history.

Design Technology

Electrical Poster

We will design and create an informative electrical poster, developing ideas from research. We will build a simple circuit and understand how design serves a purpose.

Year 4 Curriculum Spring 2

This half term our topic is: **Adventure and Discovery**

Support your child at home:

Why not create a factfile or poster about Ancient Egyptian lifestyles?

Computing

We are Bloggers

We will learn how to write and publish blog posts, sharing our experiences and opinions online. We will also develop our digital skills by adding images, audio and video, and shall comment on each other's work respectfully.

Religious Education

Christianity

We will explore the theme of forgiveness through The Last Supper and the story of The Prodigal Son. We shall discuss what Christianity teaches about forgiveness and whether any actions are truly unforgivable.

PSHE

Healthy Me

We will learn about healthy friendships, group dynamics and peer pressure, and explore how to be assertive.

Maths

Fractions / Decimals

We will develop our understanding of fractions, including mixed numbers and improper fractions, explore equivalent fractions, and practise adding and subtracting fractions with confidence. We will also build our knowledge of decimals (tenths) and continue to strengthen fluency through regular arithmetic practice.

French

Homes

We will learn vocabulary related to houses including types of home, rooms and furniture.

Physical Education

Heading

We will improve our overall fitness by developing speed, strength, coordination, agility and stamina. We shall also develop throwing, catching, bowling and batting skills, applying them tactically in game situations.
