

What should I already know?

The continents are Europe, Asia, North America, South America, Africa, Australia and Antarctica

The main oceans are Pacific, Atlantic, Indian, Southern, and Arctic oceans

Some features are physical features, some are human features

Geography - Year 3
Autumn 1

Rainforests

Vocabulary

climate	The weather conditions in an area over a period of time
humid	Where the air is warm and wet
human features	those features made by people
physical features	things in the landscape formed by nature
settlement	A place where people live
culture	The ideas, customs and social behaviour of a particular people or society

Knowledge

A rainforest is a dense, hot forest that has a high level of rainfall.

Most of the world's rainforests are located near the equator.

There are several layers of vegetation in a rainforest.

Each layer has different names and temperatures.

The climate in tropical rainforests are hot and humid.

Millions of people live in the rainforests. Most communities in the deep rainforest live in a traditional way. Concrete buildings are only found on the edge of rainforests.

Skills

Begin to ask/initiate geographical questions.

Use sources of information.

Investigate places and themes at more than one scale

Begin to collect, record and analyse evidence and draw conclusions

With support, locate places on larger scale maps
