

GROUP 3 – WEEK 1 ARITHMETIC HOMEWORK

 Homework Help Place Value - The value of a digit depends on where it sits in a number. - Example: In 5,346, the 5 is worth 5,000. Rounding 0–4 = round down 5–9 = round up Fractions $\frac{1}{2}$ = divide by 2 $\frac{1}{4}$ = divide by 4	BIDMAS Do anything in brackets first then indices (powers) then division, then multiplication, then addition then subtraction. Always follow the order. Example: $4 \times 5 + 3$ $= 4 \times 5 = 20 + 3$ $= 23$
