

# Plants

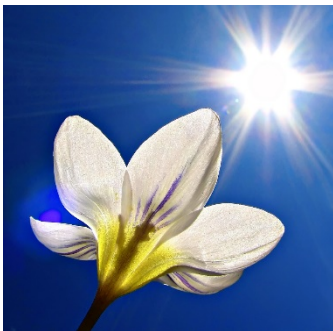

## Sticky Facts

Plants, including trees, take in water through the roots from the ground.
The roots keep the plant in the ground.
Plants need water, light & a suitably warm place to grow & stay healthy.
When a seed starts to grow, it is called germination.
Seeds grow into shoots which develop into small plants above the ground. The plant then grows bigger and bigger.
Plants can grow without soil.
A tree is a large plant. A trunk is a large stem.

## Key Vocabulary

Roots
Stem
Flower
Leaves
Trunk
Branches
Twigs
Petal
Seed
Bulb
Evergreen
Deciduous
Water
Light
Warmth
Germinate
Shoot
Mature plant

During this unit, I will be learning to:	Completed	Self-Assessment
<ul style="list-style-type: none"> <li>observe and describe how seeds and bulbs grow into mature plants</li> </ul>		
find out and describe how plants need water, light and a suitable temperature to grow and stay healthy.
